

Nature, Technology and Tomorrow Initiative

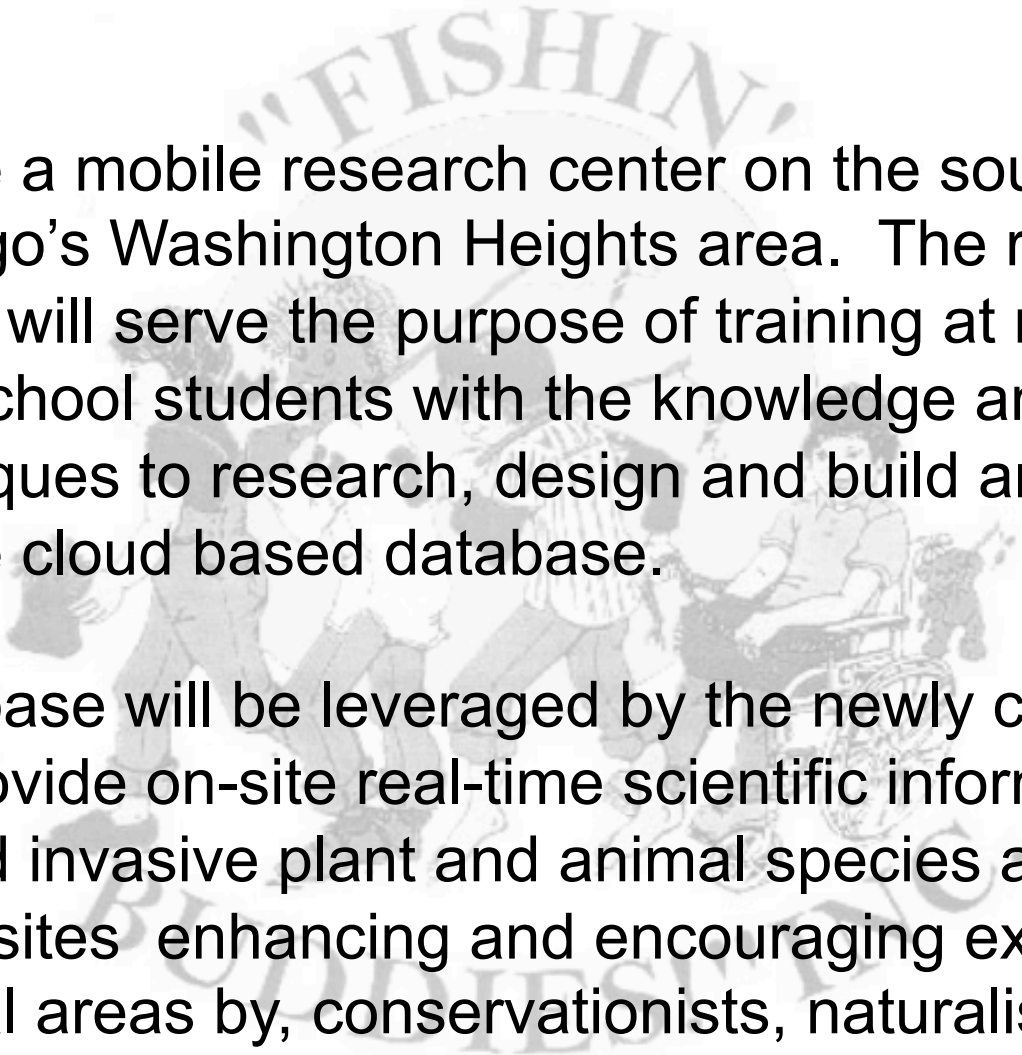

The 3 Goals we plan to accomplish through the NTT Initiative are as follows;

1. Create an APP on the iOS and Android platform that will push a virtual display of all native and invasive plant & animal Species at a local Cook County Forest Preserve based on the users global position

iOS 6

- 
2. Create a mobile research center on the south side of Chicago's Washington Heights area. The research center will serve the purpose of training at risk urban high school students with the knowledge and techniques to research, design and build an open source cloud based database.

The database will be leveraged by the newly created FB App to provide on-site real-time scientific information on the native and invasive plant and animal species at Forest Preserve sites enhancing and encouraging exploration of the natural areas by, conservationists, naturalists, student researchers, and the general public.

- 
- The logo for "FISHIN' BUDDIES! INC." is a circular emblem. At the top, the word "FISHIN'" is written in a large, bold, serif font, with the apostrophe and "N" slightly smaller. Below this, there is a black and white illustration of five children walking in a line. From left to right: a boy in a striped shirt and jeans, a girl in a striped shirt and jeans, a boy in a striped shirt and jeans, a girl in a striped shirt and jeans, and a boy in a striped shirt and jeans who is using a wheelchair. The children are all smiling and appear to be holding hands. At the bottom of the emblem, the words "BUDDIES! INC." are written in a large, bold, serif font, with the exclamation mark and "INC." slightly smaller.
3. Create a training program that leverages the new research center to train local small business owners on how to design, build, and implement websites, ecommerce and Google Apps into their business model on free open source platforms to help businesses digitize operations, save energy and reduce waste.
