PARTNERSHIP FOR A CONNECTED ILLINOIS

Telemedicine is creating jobs and reducing costs in rural communities with fiber-based broadband networks by removing geography and time as a traditional barrier to required care, all the while also improving the economic health of a community.

If employed on a daily basis to address chronic illness, remote online monitoring may save hospital, drug, and outpatient costs by 30% and also improve the quality of care and quality of patients' lives.

Broadband Expanded

Overall, real person spending on healthcare HAS RISEN BY 40% in the past decade.

Broadband Expanded

According to CompTIA, more than 50% of physicians use a smartphone for work purposes.
